

INDICATED TO PROMOTE A HEALTHY GASTROINTESTINAL SYSTEM.

**BIALTEC** has a patented **microencapsulation** technology, which guarantees resistance to industrial and biological processes and transit to the intestine. **Fortcell Feed® Pets** is designed to increase the response of the immune system, improve digestion and stabilize the microbiota.

## Why our patented micro-encapsulation technology?

### Industrial processes

>**80%** Survive in extruded feed concentrates

>**90%** Survives temperatures of 80°C for 15 minutes

It does not need refrigeration

### Biological processes

>**90%** survives in hydrochloric acid pH 2 for 2 hours at 37°C

>**90%** Released in a controlled way at 39°C pH 6.0 and pancreatic action

Performance = Excellent

## COMPOSITION

**Fortcell Feed® Pets** is a nutritional additive that includes probiotics, prebiotics and phytobiotics, with a greater diversity of strains that are highly compatible with the intestine of dogs and cats.

## ACTION MODE

- Restores intestinal function in pets after antibiotic treatment.
- Improves digestion and absorption of nutrients in dogs and cats of all sizes, breeds and ages, enhancing the immune system.
- With the intake of Fortcell Feed® Pets we potentiate the intestinal microbiota to face times of stress, improving their quality of life.

## PREVENTS

- Gastrointestinal diseases.
- Joint problems.
- Muscular weakness.
- Weak hair.
- Avoid flatulence.
- Allergy and immunity problems related to changes in the intestinal microbiota.

### DOSE

100 - 200 g/ton

### PRESENTATION

5 kg, 10 kg, 25 kg.
