

Fortcell Feed swine

NATURAL PRODUCTION IMPROVEMENT

BIALTEC has a patented **microencapsulation** technology that guarantees resistance to industrial and biological processes. **Fortcell Feed® Swine** Farming is designed to increase the response of the immune system, improve digestion and stabilize the microbiota. We have specific formulations for the different productive stages of the pig.

COMPOSITION

Prebiotics and probiotics (specific mixture of cooperating strains for pigs), with a high degree of fixation to the intestinal epithelium, capable of colonizing the gastrointestinal tract and modulating the immune response, added in doses approved by the European Union. Especially indicated as a growth promoter and control of pathogenic bacteria.

ACTION MODE

- Restores intestinal function in swine after treatment with antibiotics.
- Helps in the installation of the intestinal microbiota.
- Contributes to the recomposition, maintenance and balance of the microbiota, improving intestinal health and integrity.

INDICADO PARA

Management of bacterial-type enteric diseases, reduction in the use of antibiotics as growth promoters, their continuous use can reduce the frequency of antibiotic treatments, indicated in issues of opportunistic bacterial challenge (depressed immune system).

ADVANTAGES

- Improver of productive indices (feed conversion, weight gain).
- Helps reduce the mortality rate.
- Increases the digestibility and assimilation of nutrients, favors the reduction of digestive disturbances.
- Helps in the control of Bacteria (control of Clostridium difficile, Salmonella spp, E. Coli, etc.)
- Alternative to the use of antibiotic growth promoters.
- Does not leave residues in the carcass, without withdrawal time.
- Does not generate bacterial resistance, not genetically modified.
- Improves the immune system.
- Its continuous use improves the health status of farms.
- It can be used in combination with antibiotics for the treatment of diseases.

DOSE

400 - 500 g/ton of feed according to farm conditions defined by Bialtec's technical criteria.
60 g for 300 liters of water.

PRESENTATION

To add to the feed: 5 kg, 10 kg, 25 kg.

Soluble: 60g
