

# Food Safety Policy

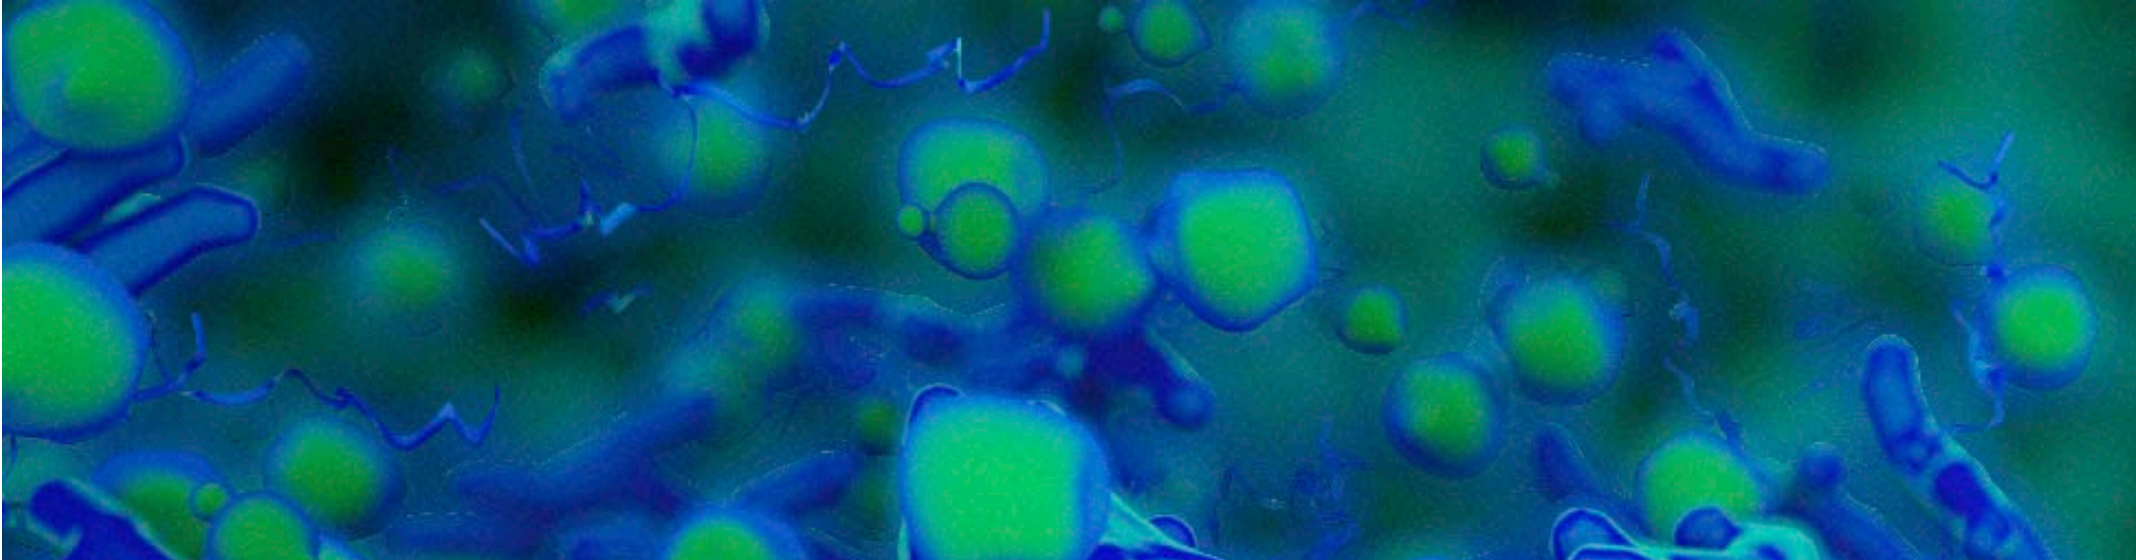

27/03/2024

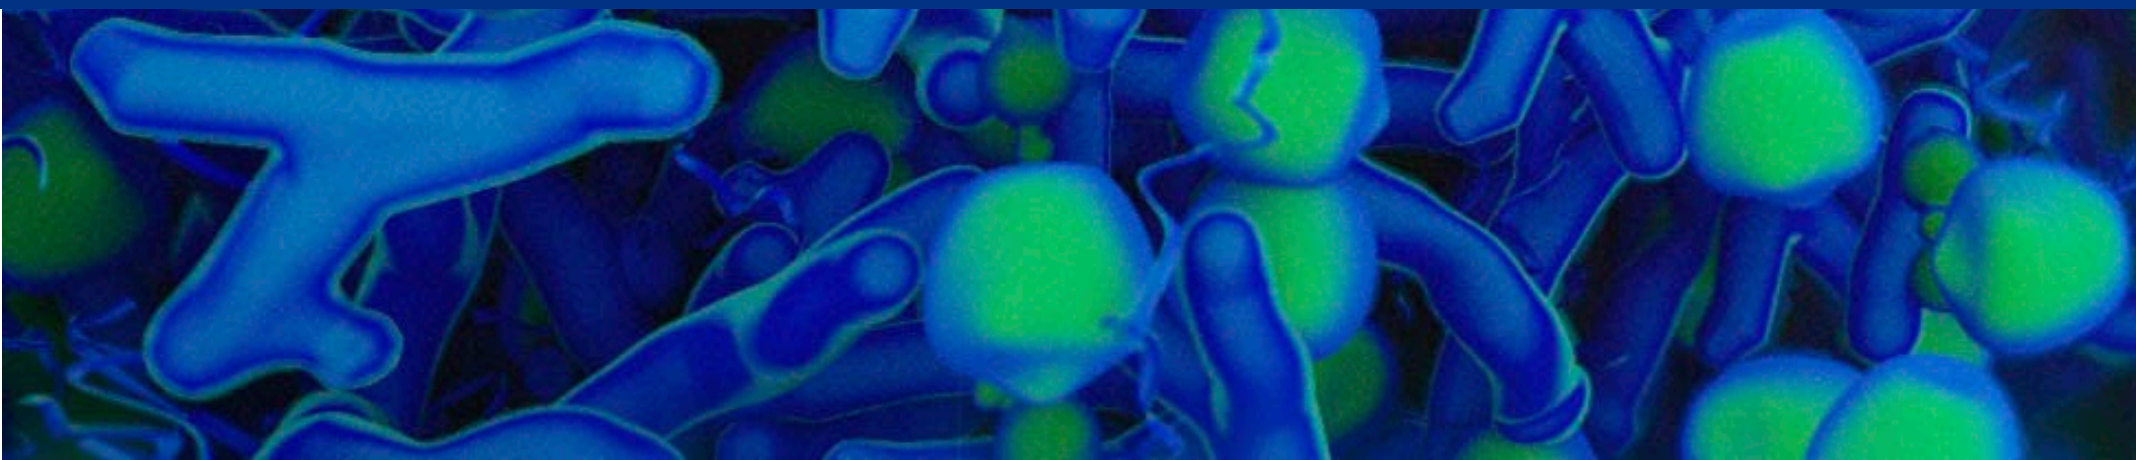

**Bialtec**

Transformamos la nutrición animal

Bialtec SAS is a company dedicated to the design and production of precision microencapsulated additives for animal consumption. These additives have the ability to reconfigure the intestinal microbiome into a more efficient and healthier state, maximizing nutrient absorption while minimizing environmental impact.

We recognize our responsibility to ensure the safety of our products at all stages of production, from the sourcing of raw materials and manufacturing processes to final distribution.

**Therefore, all Bialtec SAS processes are committed to:**

1

Complying with food safety requirements, including local, regional (ICA), and applicable international regulations for the production of animal feed additives. We use raw materials with quality certifications to meet mutually agreed-upon food safety requirements with our clients.

2

Identifying, assessing, and proactively managing food safety risks at all stages of the supply chain, from raw material reception and production to the delivery of the finished product.

3

Ensuring that all personnel involved in handling our products are properly trained in food safety. We provide continuous training for our staff on safe production, handling, and dispatch practices, as well as the identification and control of food safety risks, based on our annual training plan.

4

Promoting a culture of continuous improvement in all aspects related to food safety by regularly reviewing our processes, implementing corrective and preventive actions, and monitoring performance indicators.

5

Maintaining this policy as documented information that must be communicated, understood, and applied at all levels within the organization. Clear, timely, and accurate communication will be ensured with stakeholders, including clients, suppliers, employees, and any other interested parties, to build trust in the safety and quality of our products. This will be achieved through emails, the company website, and discussions with external stakeholders. Internally, communication will be carried out via internal emails, the company website, monthly newsletters, bulletin boards, and interactive talks.

6

Using this policy as a reference framework for establishing and reviewing the objectives of the food safety management system.

Mauricio Agudelo  
CEO Bialtec
